

AFTAB KHALID

Senior UX Designer | Product Designer

Senior UX designer with deep craft across SaaS, Fintech, IoT, and AI products. I have spent 12 years solving product problems that look like design problems on the surface but are really about what users need to trust, understand, and act on. I work independently at senior pace, bring research-grounded decisions to every brief, and produce design that holds up when real users encounter it.

WORK EXPERIENCE

Lead UX/UI Designer

Mar 2022 – Present

Vaival Technologies

Delivered design for 30+ SaaS products and 100+ websites for global clients. Launched Sync, a design subscription platform with 30 clients and zero churn.

- Built a design system that boosted delivery speed by 30% and cut UI complaints.
- Integrated AI tools to enhance UX research and prototyping.
- Designed dashboards for email marketing platforms, ensuring WCAG compliance and thorough usability testing.

Lead UX Designer

Dec 2016 – Feb 2022

BlueEast (Pvt) Ltd.

5 years with BlueBase, Orient Group's IoT platform for smart appliances. 150,000 users. Designed a unified IoT ecosystem for ACs, fridges, and Wi-Fi devices. Simplified complex hardware control for non-tech users.

Key features:

- AC Autopilot mode introduced
- Water quality alerts
- Food spoilage detection
- Led UX research strategy, including personas, journey maps, and usability testing
- Informed product roadmap decisions
- BlueBase's design quality positioned Orient appliances as the smarter choice, enhancing acquisition and retention.

Domains:

- SaaS
- Fintech
- IoT
- Enterprise Software
- AI Products
- Mobile Apps

Principal UI/UX Designer

Oct 2013 – Dec 2016

KuroBase

KuroBase was a Database-as-a-Service startup on Couchbase for developers. 12,000 onboarded, with 500+ companies like Microsoft, Pepsi, Dolby, and more.

- Designed UI/UX for a developer-focused DBaaS platform, ensuring a balance between technical accuracy and user clarity.
- Addressed UX challenges in workspace and user management through intuitive permission hierarchies and role-based access controls.
- Created UI/UX guidelines for developers to uphold design standards that emphasize precision and trust.

Product Designer

Nov 2011 – Oct 2013

7Vals

B2B asset management platform. Enterprise clients at initial stage including Microsoft, CNBC, Dolby, and Pepsi.

- Designed end-to-end UX for an enterprise asset management platform replacing deeply habituated Excel-based workflows, with no comparable product in market to reference.
- Contributed to product strategy and feature definition from day one. Validated features with real users before production release and ran A/B tests to evaluate competing approaches.
